Biostatistician / Health Analytics Open Rank Faculty Search

The Virginia Tech Department of Statistics (www.stat.vt.edu) invites applications for an open rank tenured or tenure track faculty position in biostatistics to begin in August 2017. Requirements include a Ph.D. in Biostatistics, Statistics, Biometry, Bioinformatics, Biomedical Informatics or a closely related field. The position is a 9-month, tenure or tenure-track appointment, with the opportunity to conduct additional extramurally funded research in the summer. Salary is competitive and commensurate with qualifications and experience.

This position is part of a university-wide emphasis on data analytics and statistics that will include hiring up to 9 faculty in the coming year, including biostatistics and health analytics, at Virginia Tech. The successful applicant will:

- Lead a biostatistics research program and expand institutional capabilities by promoting and supporting research in the health sciences, as well as fostering synergistic interactions among Virginia Tech faculty, to build a foundation for additional biostatistics research.
- Collaborate with researchers, scientists, and clinicians from across the university as part of Virginia Tech’s burgeoning health and medical research programs. Collaborating organizations include the Virginia Tech School of Medicine, the Virginia Tech Carilion Research Institute, the Virginia-Maryland College of Veterinary Medicine, the Virginia Tech Public Health Program, the School of Neuroscience, and the Department of Statistics.

Responsibilities

The successful applicant will create and maintain a nationally prominent research program focused on biostatistical methods and applications. As a founding member of the Data Analytics and Decision Sciences destination area (http://provost.vt.edu/destination-areas/da-data.html), he or she will develop and collaborate in transdisciplinary research with faculty and scientists from across campus, including the Virginia Tech Carilion Research Institute (http://research.vtc.vt.edu/), the Virginia Tech School of Medicine (http://medicine.vtc.vt.edu/), the Virginia-Maryland College of Veterinary Medicine (http://www.vetmed.vt.edu/) and the Virginia Tech Public Health Program (http://mph.vetmed.vt.edu/index.html).

Expectations for this position include providing effective mentoring for postdocs and graduate students (and junior faculty in the case of senior applicants); teaching and advising a diverse population of undergraduate and graduate students; continuing development of professional capabilities and scholarly activities; curriculum development; participation in department, college, and university governance; and professional service. The faculty handbook (available at www.provost.vt.edu) provides a complete description of faculty responsibilities.

Required qualifications

Applicants must have a strong background in biostatistics; compelling promise for developing, or in the case of senior applicants continuing, a well-funded, internationally distinguished research program of methodological and collaborative research; demonstrated experience with and commitment to interdisciplinary and transdisciplinary research; a willingness to cross disciplinary boundaries to tackle complex scientific challenges; a desire to advise and teach a student body which is diverse with respect to socio-economic status, interests, and abilities; and commitment/sensitivity to address issues of diversity in the university community. Applicants must have earned a doctorate in a relevant discipline at the time of appointment.

Preferred qualifications

Preference will be given to senior candidates with a distinguished scholarly record of teaching and research in statistical methods applied in a medical or health context, a demonstrated track record of
leadership in the development of biostatistics educational and research programs, and/or an interest in
health analytics.

How to apply

Questions regarding the position can be directed to Professor Ron Fricker (rf@vt.edu), chair of the
Faculty Search Committee and head of the Department of Statistics. Applications must be submitted
online at http://listings.jobs.vt.edu (#TR0160168) and should include a cover letter, curriculum vitae,
teaching statement, research plan, and contact information for at least three references. Review of
applications will begin on January 15, 2017 and will continue until the position is filled. As part of the
hiring process, the successful applicant must pass a criminal background check.

Virginia Tech is committed to a culturally and ethnically diverse campus environment and to principles
that promote inclusive practices. Candidates are encouraged to address in their cover letters how their
research, teaching, or service has prepared them to contribute to our commitment to diversity and
inclusion in higher education. More information is available at www.inclusive.vt.edu/index.html.

Virginia Tech is an EO/AA university, and offers a wide range of networking and development
opportunities to women and minorities in science and engineering. The university recognizes that
meeting the needs of today’s professional couples is a key factor in recruiting and retaining new faculty
and has established a dual career office to facilitate our commitment (www.hr.vt.edu/jobs/job_seeker/dualcareers/).

The Department of Statistics offers a supportive
environment, including a mentoring program to its junior faculty. Individuals with disabilities desiring
accommodations in the application process should notify Ms. Betty Higginbotham, Department of
Statistics, Tel: (540) 231-5657, Email: higgyvt@vt.edu.
