Virginia Tech has an opening for a Visiting Assistant Professor for appointment in the 2015-2016 academic year. Duties and responsibilities include teaching two courses per semester from our Statistics program (www.stat.vt.edu) and Computational Modeling and Data Analytics program (www.science.vt.edu/ais/cmda). A graduate course may be among the four taught depending on applicant qualifications. The successful applicant must have a doctorate in statistics or a closely related field, and a working knowledge of modern computational techniques in statistics and data analytics. Previous experience in teaching at the undergraduate level is preferred. Applications must be submitted online at listings.jobs.vt.edu/postings/56738 where full details may be found. Review of applications to begin May 18, 2015.
